DETAILED ACTION

This Office Action is in response to the amendment filed 17 August 2006.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Nishida (U.S. Patent 5,584,941).

In re claims 1 and 10, Nishida discloses a solar cell (Fig. 2) that contains a substrate (201), an electrically conducting film (202) deposited on substrate, wherein the film is a metallic alloy other than Cr-alloy when substrate is Si, wherein a junction of film and substrate forms a plane, wherein the current flow within the film is substantially parallel to the plane, wherein substrate consists essentially of a substrate material (Si) which forms a metasable bond with film and wherein deposition is in at least a high vacuum environment. (Column 2, lines 65-67)

In re claim 2, the substrate material is a non-metallic element (Si). (Column 3, line 41)

In re claims 4 and 7, the film material is NiO. (Column 5, lines 53-56)

Art Unit: 2822

In re claim 5, an overlayer (203) on the conducting film, wherein the overlayer is Si. (Column 3, line 43)

In re claims, 3 and 6, the film material is Ag, when formed on a steel (Fe composition) substrate. (Column 6, lines 19-21)

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 8-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nishida.

In re claims 8-9, Nishida discloses all the limitations except for the thickness of the substrate and the film. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have the desired thickness of the substrate and the film, since it has been held that where the general condition of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. In re Aller, 105 USPQ 233. (1955)

Response to Arguments

Applicant's arguments with respect to claims 1-13 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2822

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kiesha L. Rose whose telephone number is 571-272-1844. The examiner can normally be reached on T-F 8:30-6:00 off Mondays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Zandra Smith can be reached on 571-272-2429. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
